How Did We Choose the Best Online Casinos in the UK?

Licensing and Safety

No one wants to make the mistake of using money on a shady site that won't take care of their funds. Technology like SSL encryption is a common feature of online gambling sites that helps protect your information.

All the sites we've listed also have a licence from the UK Gambling Commission or another reputable authority to prove their legitimacy.

Customer Support

The best UK casino sites should have fast and reliable customer support that users can quickly get in touch with.

There should be multiple contact methods and alternative support resources available. These include features like an FAQ section and live chat, so everyone can get the help they need.

Game Catalogue

The game catalogue is the main draw of any online casino and should include a large selection of titles across various game types.

While some sites focus on specific game types, the best online casino sites have something for

everyone. We make sure to look for the most entertaining casinos with the best variety.

Bonus Variety

Of course, you're not going to stick around at any online casino site in the UK if you're not earning valuable rewards.

All the best casino sites in the UK have a wide range of bonus types that ensure you can claim valuable rewards regardless of your preferences. The best promotions also offer regular weekly and monthly bonuses such as free spins to keep players coming back.

How Can I Tell If an Online Casino in the UK Is Safe?

While it's easy to check if an online casino is legitimate, it's still an essential step that you need to take. Here are the basic checks to make before choosing an online casino:

Security Technology: SSL encryption has become a standard feature of many modern online casino sites in the UK.

This technology helps protect your data by preventing criminals from intercepting transactions between you and the site. As not every online casino mentions it, it's best to check if a site uses SSL technology.

Licensing Information: The UK Gambling Commission must licence all legal casino sites in the UK.

You can usually find this information at the bottom of any page, and make sure to read the details thoroughly. Some sites can have two licences for different regions if they aren't based in the UK.

What Casino Games Can I Play at Online Casinos?

Online casinos offer various games to enjoy, with the most popular being slots, table games, and live casino games.

Each category can include many sub-types, such as jackpot and Megaways for slots or blackjack, roulette, and baccarat for table games. Some sites also offer alternative games like bingo and scratch cards that appeal to more specific audiences.

How Old Must I Be to Legally Play at UK Online Casinos?
